A card-cheating device found upon the sleeve of Barker at the time of his arrest was used against him at the trial today. The prisoner went to jail. This device was a pair of silver-plated clutches with which the operator could draw cards from the table under his hands up his sleeves, to prepare for any emergency of the game. The prisoner came here recently from New York.

Smith, for many years the superintendent of the water works, left here this morning for Sonora, Mexico, where he will manage a tract of 30,000 acres of land in the silver and copper mining district, and near the Green Corn and mining properties. The property in which Mr. Smith is interested employs a large force of Yaqui Indians and Mexicans, and is reached from Magdalena, Mex., by crossing the mountains and following a river bed for a distance of eighty-five miles. ECZEMA ON LITTLE GIRL

Sleepless Nights for Mother and Awful Suffering of Child.

CURED BY CUTICURA

Had Given up All Hope of Ever Making Any Cure.

Mrs. I. B. Jones, Addington, Ind. T., writes: "My little girl had been suffering for two years from eczema, and during that time I could not get a night's sleep, as her ailment was very severe. I had tried so many remedies and spent so much money, deriving no benefit, I had given up all hope of making any cure. As a last resort I was persuaded to try Cuticura, and to my great delight a marked change was manifested from the first application. I gave the child a bath with Cuticura Soap, using a soft piece of muslin cloth. This I did twice a day, each time following with Cuticura Ointment, and at the same time gave her the Resolvent, according to directions. One box of Ointment and two bottles of the Resolvent, together with the Soap, effected a permanent cure. I submit this for publication, hoping it will assist other sufferers in curing themselves."

GIVE RIGHT OF WAY TO TIDEWATER RAILROAD

Citizens of Chase City Meet and Decide to Take Action.

(Special to The Times-Dispatch.)

CHASE CITY, VA., March 23.—From present indications the Tidewater Railroad will be built and will take this town in the route. Mr. Harry Caperton Elliott, attorney of the company, has been here. He interviewed a number of citizens and exhibited the line of survey, asking co-operation to the extent of a donation of the right of way.

A large meeting of representative citizens endorsed the enterprise, and it was determined to secure the right of way from land owners. A committee, composed of Dr. A. T. Finch, T. E. Roberts, C. B. Blum, Lucius Gregory and R. M. Jeffreys, was appointed to see the land owners along the line.

The road will come from Norfolk by Emporia, then south of Meherrin River through Brunswick county, and cross the Atlantic and Danville Railroad at South Hill, then through the northern part of Mecklenburg, passing the southern borders of this town, thence westerly seven-

teen miles to Randolph station, where it will cross the Richmond and Danville Railroad. A route has also been surveyed through the northern part of Mecklenburg, and crossing the Richmond and Danville at Meherrin station.

The route through Mecklenburg offers good grades of about seven feet to the mile, and the section over which it will go is rich in agricultural products and forestal resources.

The town of South Hill has appointed a committee to co-operate with the people here in securing the right of way through this county.

The interruption may last a couple of weeks, however.

Some Sure Harbingers of Spring. Senator Martin's Mother Ill.

(Special to The Times-Dispatch.)

SCOTTSVILLE, VA., March 23.—Some ladies in the office of Dr. J. P. Blair, of this place, one morning last week were surprised by a mild-looking, fat baby, who had been given him to play with. Sure enough the bottom of the bottle was gone, and when the doctor wiped out baby's mouth with a napkin some small particles of glass were there. Everybody was worried. Only the fourteen-month-old baby was unharmed.

Presently the doctor commenced searching the floor, and to his great relief found that two halves of the bottom of the bottle. From the number of tricks the baby could go through with a few minutes later, there was no cause for further uneasiness.

Trick after trick, the baby was being burnt, spring showers are coaxing the green grass upward, little chicks are hatching, the road machine is at work, the plow is plowing, and fish are biting in this part of the world.
